

§ 100.16

(v) Educational institutions.

(6) Communities or areas which are economically, socially, and communally integrated shall be considered in the aggregate.

(b) The Board shall periodically review rural determinations. Rural determinations shall be reviewed on a 10-year cycle, commencing with the publication of the year 2000 U.S. census. Rural determinations may be reviewed out-of-cycle in special circumstances. Once the Board makes a determination that a community has changed from rural to non-rural, a waiting period of 5 years shall be required before the non-rural determination becomes effective.

(c) Current determinations are listed at § 100.23.

§ 100.16 Customary and traditional use determination process.

(a) The Board shall determine which fish stocks and wildlife populations have been customarily and traditionally used for subsistence. These determinations shall identify the specific community's or area's use of specific fish stocks and wildlife populations. For areas managed by the National Park Service, where subsistence uses are allowed, the determinations may be made on an individual basis.

(b) A community or area shall generally exhibit the following factors, which exemplify customary and traditional use. The Board shall make customary and traditional use determinations based on application of the following factors:

(1) A long-term consistent pattern of use, excluding interruptions beyond the control of the community or area;

(2) A pattern of use recurring in specific seasons for many years;

(3) A pattern of use consisting of methods and means of harvest which are characterized by efficiency and economy of effort and cost, conditioned by local characteristics;

(4) The consistent harvest and use of fish or wildlife as related to past methods and means of taking; near, or reasonably accessible from, the community or area;

(5) A means of handling, preparing, preserving, and storing fish or wildlife which has been traditionally used by

50 CFR Ch. I (10–1–06 Edition)

past generations, including consideration of alteration of past practices due to recent technological advances, where appropriate;

(6) A pattern of use which includes the handing down of knowledge of fishing and hunting skills, values, and lore from generation to generation;

(7) A pattern of use in which the harvest is shared or distributed within a definable community of persons; and

(8) A pattern of use which relates to reliance upon a wide diversity of fish and wildlife resources of the area and which provides substantial cultural, economic, social, and nutritional elements to the community or area.

(c) The Board shall take into consideration the reports and recommendations of any appropriate Regional Council regarding customary and traditional uses of subsistence resources.

(d) Current determinations are listed in § 100.24.

§ 100.17 Determining priorities for subsistence uses among rural Alaska residents.

(a) Whenever it is necessary to restrict the subsistence taking of fish and wildlife on public lands in order to protect the continued viability of such populations, or to continue subsistence uses, the Board shall establish a priority among the rural Alaska residents after considering any recommendation submitted by an appropriate Regional Council.

(b) The priority shall be implemented through appropriate limitations based on the application of the following criteria to each area, community, or individual determined to have customary and traditional use, as necessary:

(1) Customary and direct dependence upon the populations as the mainstay of livelihood;

(2) Local residency; and

(3) The availability of alternative resources.

(c) If allocation on an area or community basis is not achievable, then the Board shall allocate subsistence opportunity on an individual basis through application of the criteria in paragraphs (b)(1) through (3) of this section.

U.S. Fish and Wildlife Serv., Interior

§ 100.19

(d) In addressing a situation where prioritized allocation becomes necessary, the Board shall solicit recommendations from the Regional Council in the area affected.

§ 100.18 Regulation adoption process.

(a) Proposals for changes to the Federal subsistence regulations in subparts C or D of this part shall be accepted by the Board according to a published schedule. The Board may establish a rotating schedule for accepting proposals on various sections of subpart C or subpart D regulations over a period of years. The Board shall develop and publish proposed regulations in the FEDERAL REGISTER and publish notice in local newspapers. Comments on the proposed regulations in the form of proposals shall be distributed for public review.

(1) Proposals shall be made available for at least a thirty (30) day review by the Regional Councils. Regional Councils shall forward their recommendations on proposals to the Board. Such proposals with recommendations may be submitted in the time period as specified by the Board or as a part of the Regional Council's annual report described in § 100.11, whichever is earlier.

(2) The Board shall publish notice throughout Alaska of the availability of proposals received.

(3) The public shall have at least thirty (30) days to review and comment on proposals.

(4) After the comment period the Board shall meet to receive public testimony and consider the proposals. The Board shall consider traditional use patterns when establishing harvest levels and seasons, and methods and means. The Board may choose not to follow any recommendation which the Board determines is not supported by substantial evidence, violates recognized principles of fish and wildlife conservation, or would be detrimental to the satisfaction of subsistence needs. If a recommendation approved by a Regional Council is not adopted by the Board, the Board shall set forth the factual basis and the reasons for its decision in writing to the Regional Council.

(5) Following consideration of the proposals the Board shall publish final regulations pertaining to subparts C and D of this part in the FEDERAL REGISTER.

(b) Proposals for changes to subparts A and B of this part shall be accepted by the Secretary of the Interior in accordance with 43 CFR part 14.

§ 100.19 Special actions.

(a) The Board may restrict, close, or reopen the taking of fish and wildlife for non-subsistence uses on public lands when necessary to assure the continued viability of a particular fish or wildlife population, to continue subsistence uses of a fish or wildlife population, or for reasons of public safety or administration.

(b) The Board may open, close, or restrict subsistence uses of a particular fish or wildlife population on public lands to assure the continued viability of a fish or wildlife population, to continue subsistence uses of a fish or wildlife population, or for reasons of public safety or administration.

(c) The Board will accept a request for a change in seasons, methods and means, harvest limits and/or restrictions on harvest under this § 100.19 only if there are extenuating circumstances necessitating a regulatory change before the next annual subpart D proposal cycle. Extenuating circumstances include unusual and significant changes in resource abundance or unusual conditions affecting harvest opportunities that could not reasonably have been anticipated and that potentially could have significant adverse effects on the health of fish and wildlife populations or subsistence uses. Requests for Special Action that do not meet these conditions will be rejected; however, a rejected Special Action request will be deferred, if appropriate, to the next annual regulatory proposal cycle for consideration, after coordination with the submitter. In general, changes to Customary and Traditional Use Determinations will only be considered through the annual subpart C proposal cycle.

(d) In an emergency situation, the Board may immediately open, close, liberalize, or restrict subsistence uses of fish and wildlife on public lands, or
